PROFILE

Analytical and technology-driven MCA student with strong foundations in Data Analytics, Data Science, and AI-powered solutions. Skilled in data cleaning, exploratory data analysis, statistical analysis, data visualization, and machine learning using Python and modern analytics tools. Passionate about transforming raw data into actionable insights and developing AI-driven systems that support business decision-making.

EDUCATION

MCA Regional College of Management (RCM), Bhubaneswar	2025 – 2027 Bhubaneswar, India
B.Sc. Chemistry (Hons.) Utkal University	2021 – 2024 Odisha, India
Higher Secondary Education (Science) DM School, RIE Bhubaneswar	2019 – 2021 Bhubaneswar, India

EXPERIENCE

Data Analytics Intern CodeAlpha	2026
- Collected and organized 2,000+ records through Python-based web scraping. - Cleaned and processed datasets using Pandas and NumPy to improve data quality. - Performed EDA to identify trends, patterns, and insights from real-world data. - Created 10+ visualizations using Matplotlib and Seaborn for reporting and analysis.	

PROJECTS

Sales Data Analytics & Business Intelligence Dashboard Tech Stack: Python, Pandas, NumPy, Matplotlib, Excel, Tableau - Cleaned and transformed 50,000+ sales records using Python and Pandas. - Performed exploratory data analysis to identify revenue trends, customer behavior, and product performance. - Created 20+ visualizations using Matplotlib and Tableau dashboards. - Automated reporting workflows, reducing manual analysis time by 60%.	
AI-Powered Market Research & Trend Analysis Platform Tech Stack: Python, Pandas, Web Scraping, NLP, Streamlit, Tableau - Collected and analyzed 100,000+ data points from online sources using web scraping techniques. - Applied AI and NLP models to identify market trends, customer sentiment, and emerging opportunities. - Automated data cleaning and preprocessing workflows for large datasets. - Developed interactive dashboards and analytical reports to support business decision-making.	
AI-Driven Customer Churn Prediction System Tech Stack: Python, Pandas, Scikit-learn, Matplotlib, Power BI - Built a machine learning model achieving 85%+ prediction accuracy for customer churn analysis. - Processed and analyzed 20,000+ customer records to identify retention patterns and risk factors. - Performed feature engineering, model training, and performance evaluation using machine learning techniques. - Developed Power BI dashboards to visualize churn risk, customer segments, and retention insights.	

SKILLS

Technical Skills Python(Pandas, NumPy, Matplotlib, Seaborn), SQL, Scikit-learn, Streamlit, Django, FastAPI	Tools & Platform Tableau, Power BI, Microsoft Excel, GitHub, VS Code, Claude AI, ChatGPT
